

Soil₂O™
A GELTECH SOLUTION®

TOPICAL

FAQ

- 1** Is Soil₂O® Topical compatible with my crops?
Yes, it is compatible with all growing material.
- 2** Is Soil₂O® Topical compatible with my soil type?
Yes, it is compatible with all soil types.
- 3** Is Soil₂O® Topical compatible with my soil's pH?
Yes. It is pH neutral.
- 4** Is Soil₂O® Topical compatible with my pesticides, herbicides, mildicides, etc.?
Yes, although it is not recommended to apply at the same time as Soil₂O® Topical.
- 5** Can I use Soil₂O® Topical in close proximity to wetlands?
Yes. It helps to reduce leaching and mitigates turbidity.
- 6** Is it safe to use around people or animals?
Yes. Soil₂O® Topical is non-toxic.
- 7** Will Soil₂O® Topical affect my crop yields?
Our tests show that crops treated with Soil₂O® Topical have an increase in crop yield.
- 8** Will Soil₂O® Topical affect mortality rates?
If you are transplanting, it will decrease the mortality rates appreciably.
- 9** Is Soil₂O® Topical compatible with my irrigation equipment?
It is not recommended to use in mist heads or a drip system. We recommend a vehicle pump-assisted sprayer. Rainbirds, furrow, center-pivot, etc. systems are all compatible but you will need to coordinate the appropriate ratios with your account manager as flow rates will vary with these larger systems.

LARGE IRRIGATION SYSTEMS

IF YOU WISH TO PROCEED WITH THIS APPLICATION VIA LARGE IRRIGATION SYSTEMS, PLEASE INFORM YOUR ACCOUNT MANAGER OF THE FOLLOWING:

- 1** Type of irrigation equipment to be used, including sprayers, fertigators, holding tanks, and pumps.
- 2** Amount of acres to be treated.
- 3** Frequency and amount of water used per zone.
- 4** GPM and length of time for each irrigation zone.
- 5** Type of crops you will be planting, crop height, and crop spacing between plantings .
