

HOT WORK PROTECTION

CELL TOWER PROTECTION (CTP) SYSTEM PREVENT DAMAGE CAUSED BY HOT WORK

The Firelce Shield® CTP system is a specialty mixing and deployment system designed to apply Firelce Shield® gel on communication towers during cutting, grinding, welding and firewatch.

Firelce Shield® CTP gel is a proprietary formula that minimizes damage caused by welding sparks, fire, and slag.

Cool & Protect surfaces, cables, and limit thermal transfer.

Reduce costs related to service outages and, in the extreme, structural failure.

Suppress incidental fires, including surrounding vegetation or property susceptible to heat damage.

Firelce Shield® CTP System Bucket (5 Lbs.)

Firelce Shield® CTP System

RECOMMENDED ADD-ONS:

Firelce Shield® 2.5 Gal. Canister
(Refills Sold Separately)

Firelce Shield® 2-Liter Canister
(Refills Sold Separately)
