

Save Water. Save Time. Save Money.

Dust Control & Water Management

Soil₂O Dust Control
15 lb Pail

Dust Free Environments & Water Conservation

Soil₂O® Dust Control is an environmentally friendly, cost-effective solution to effectively suppress particulate matter from entering air and water - solving the most stubborn dust problems. Whether you are using water, industrial salts, or other chemicals to help reduce dust, Soil₂O Dust Control is a more cost-effective, eco-friendly, and non-corrosive alternative.

Eco-Friendly

No accumulation; non-toxic to fish, mammals and plants.

Compliance

Compliant with Clean Air Act, AAQS, 40 CFR (Part 50, all Federal and State BMP's for PM10 (Dust).

Non Corrosive

Safe for vehicles and equipment. Also, compatible with existing equipment.

Applications

The Soil₂O Dust Control is an environmentally and ecologically safe soil conditioner. This formula will work effectively and safely on all types of surfaces, soil types, dirt roads, equestrian riding areas, construction sites, and more.

Coal Ash | Construction | Equestrian Areas, Paddocks, & Polo Grounds, & Trails | Gravel Runways
Helpads | Mining | Rural Roads & Yards | Solar & Wind Farms

“ During our first phase of using Soil₂O, we were able to reduce our water usage by up to 75%. This product not only helped us reduce our water costs, it also reduced our labor and fuel costs along with the amount of wear and tear on our equipment. Our ability to do all of this and use a green product is significant for our company.

-United Rock Products

How Soil₂O Dust Control Works

Soil₂O® Dust Control simply helps retain the moisture in the soil. As the Soil₂O formula is absorbed into the soil profile, it acts like millions of microscopic sponges, capable of holding up to 400x their weight in water and reduces the rate of evaporation up to 300%. The moisture retained will reduce your need to water the area - helping save time, money and labor. After the initial application, the average customer will only need to maintain the area once a week.

400x
TIMES THEIR
WEIGHT IN WATER

300%
REDUCED RATE
OF EVAPORATION
